

Bay Area Data Science Competition Kickoff

Welcome!

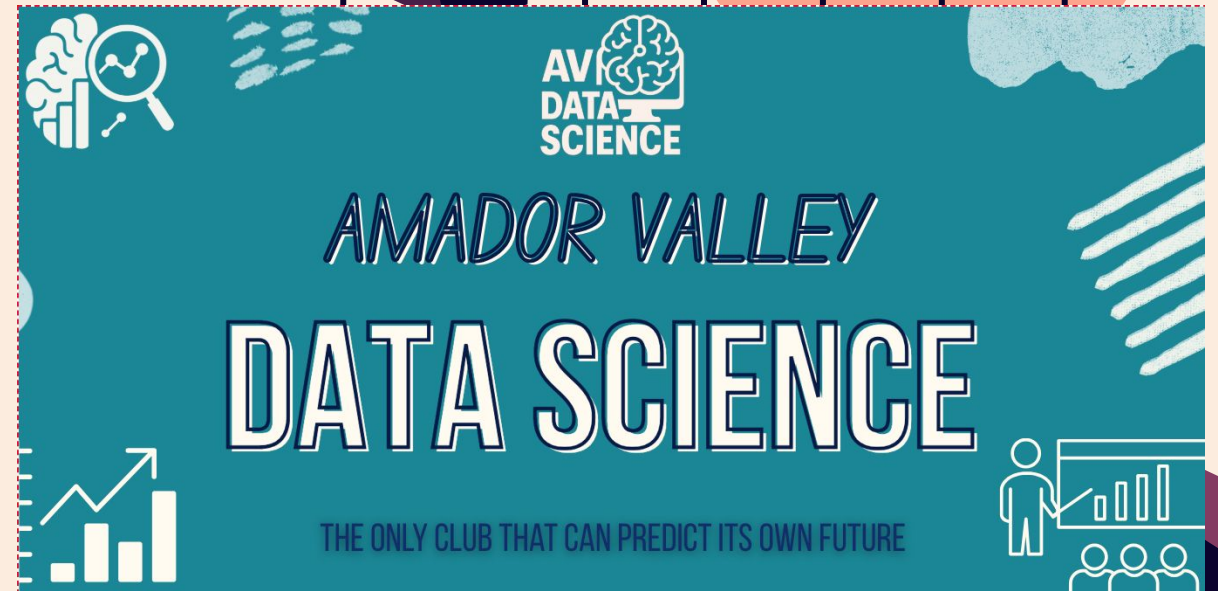

Join google classroom!

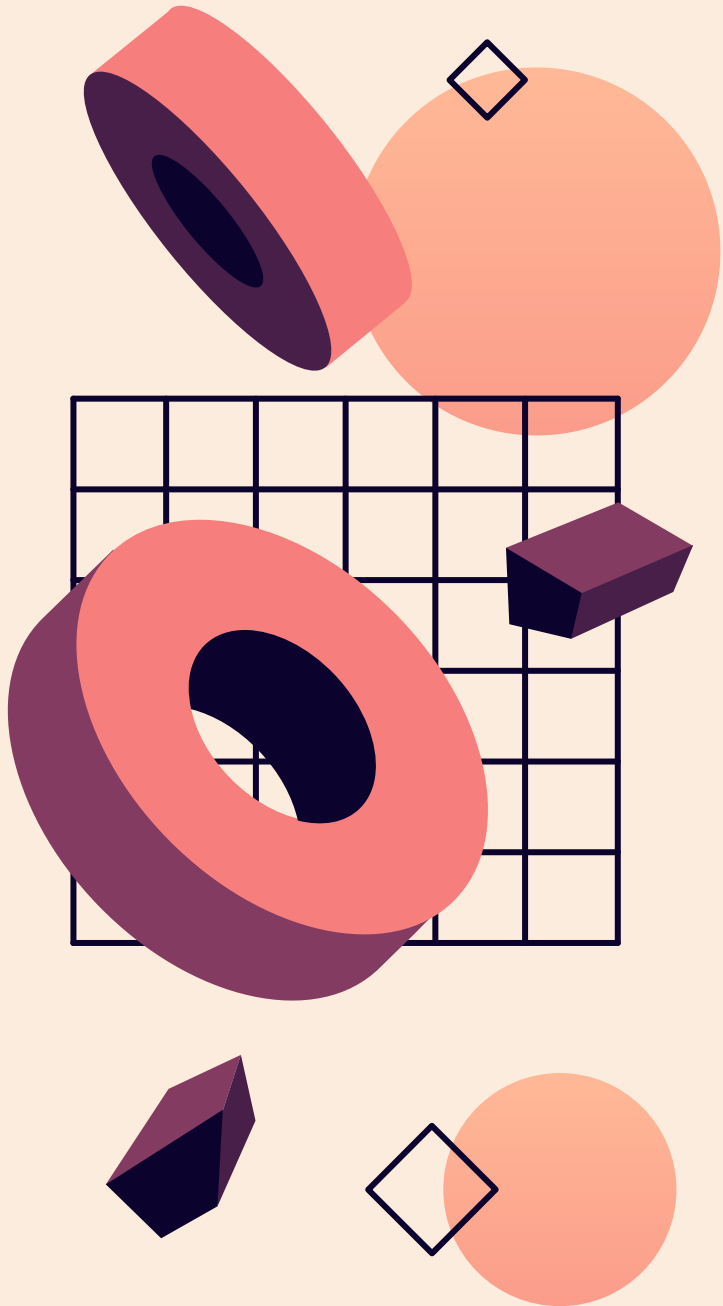

Code: gryfyjey

Introduction

We are AV Data Science, a data science club at Amador Valley High School in Pleasanton. The goal of this datathon is to bring opportunities to learn data literacy to everyone, regardless of age, experience or career interests.

Q&A

01

What is this competition?

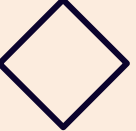

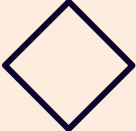

A regional challenge for Bay Area middle and high school students to use data science and technology to solve real-world problems. Participants create innovative projects to improve communities and everyday life.

The theme: Sustainable Solutions

Any software, data analysis, or conclusion that helps with sustainability in the environment, our community or in our lives

Key Steps for Your Project

When building your own workflow, remember the three-step flow:

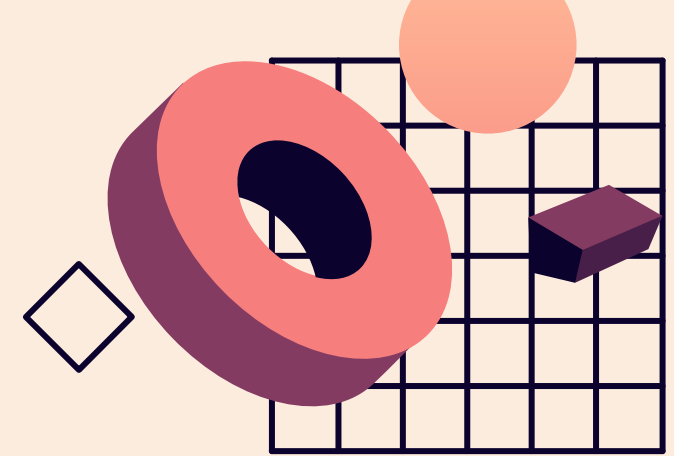

1. **Identify:** Find a real challenge in your community or a system people rely on.
2. **Analyze:** Use publicly available or self-collected data to find patterns. It can be helpful to find statistics, conduct tests, and visualize the data to do this.
3. **Propose:** Use those insights to demonstrate a tool, app, or research-driven solution. It can be: a predictive model, a conclusion to a hypothesis test, or an organized database. Use this opportunity to be creative!

Example thought process

Alex comes to school late everyday	Why does Alex come to school late everyday?	- He scrolls for 10 hours everyday, causing him to sleep late and wake up late - Track his school arrival time and compare it to how much he sleeps	- He should sleep earlier - Find optimal sleep time	- Build an app to help Alex track his sleep
---	---	---	---	---

Timeline

part 1

3/15

Materials released

We release all of our competition materials, including rubric, presentation templates, and resources to help you get started

3/18

Workshop 1

Python Masterclass: 5:30 pm – 6:30 pm

3/19

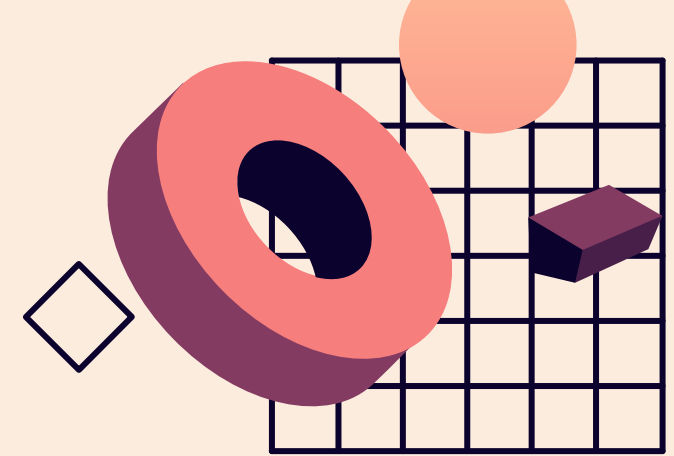

Workshop 2

Dataset curation and analysis: 5:30 pm – 6:30 pm

Timeline

part 2

3/22

Workshop 3

Data visualization: 5:30
pm – 6:30 pm

3/23

Workshop 4

Office hours + project
feedback and Q&A: 5:30
pm – 6:30 pm

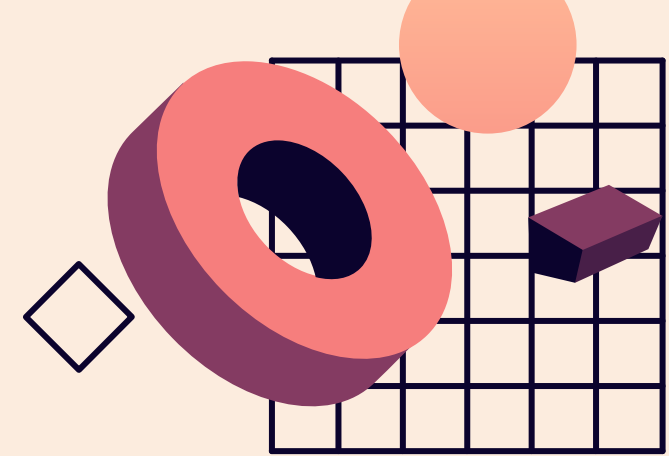

3/27

Submission deadline

Presentation slides and
github (if applicable) due by
11:59 pm

Timeline

part 3

3/28

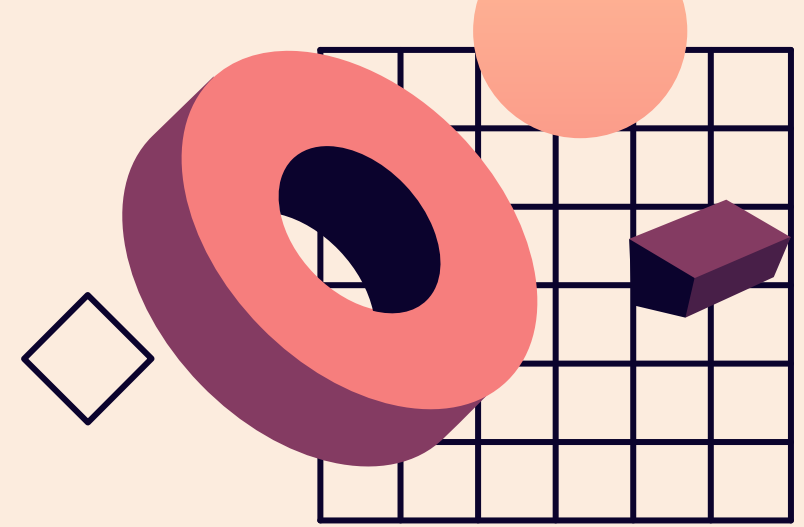

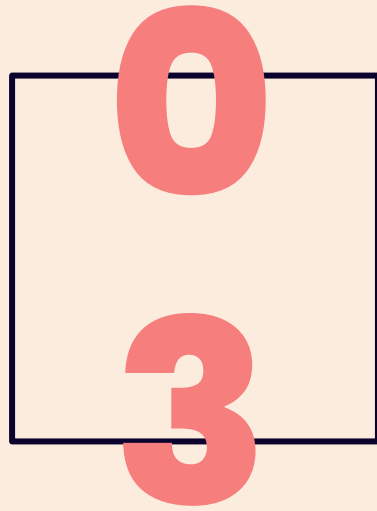

3/29

Top 10 announced

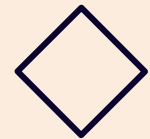

While everyone should be prepared to present, the top 10 will be notified 24 hours in advance that they will be confirmed to present.

Presentations

- Event is 2 - 5 pm
- Presentations will mostly be from 2:30 to 4:30

Submission requirements

Submission requirements

01

Presentation

Slidedeck on what your topic is, methodology, data analysis, visuals and conclusions – you will be presenting this on 3/29 if you are selected as top 10. [Link to slides template](#)

03

Team members

If you are in a team, designate your team leader to submit on behalf of the group. NO DUPLICATES PLEASE

02

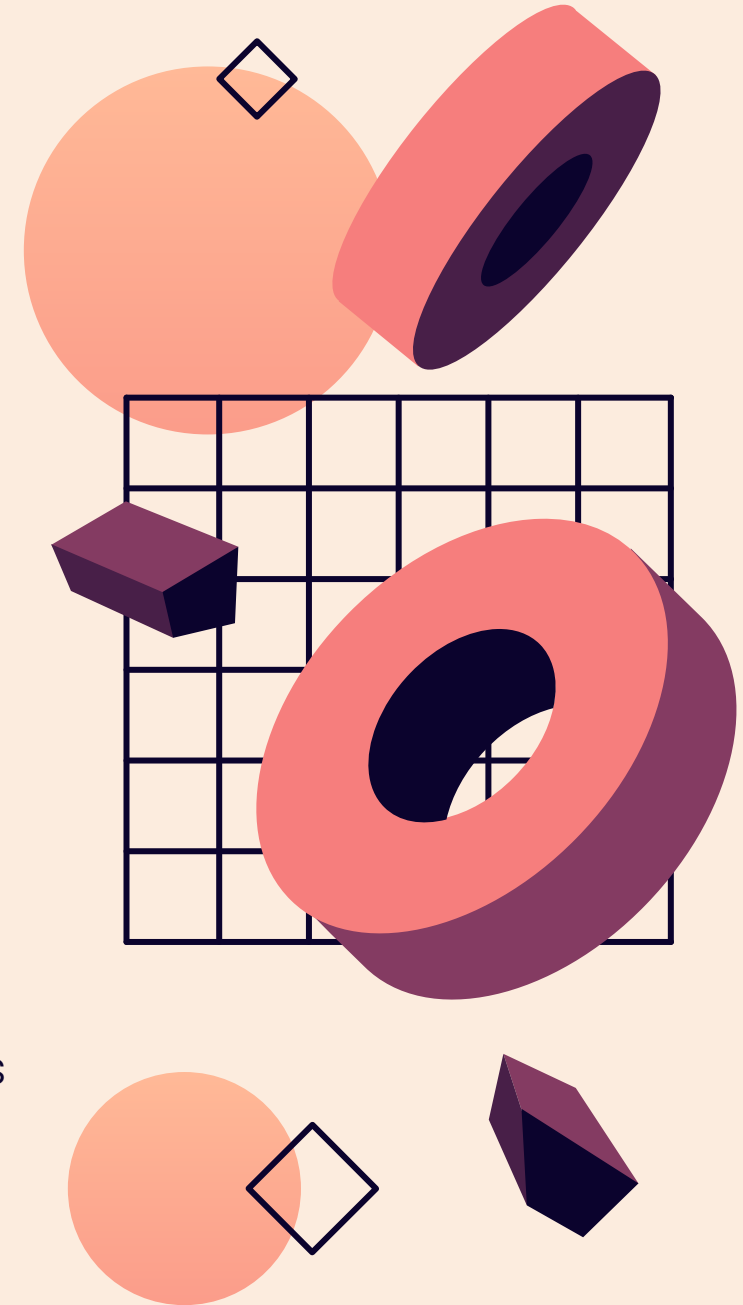

Github/code

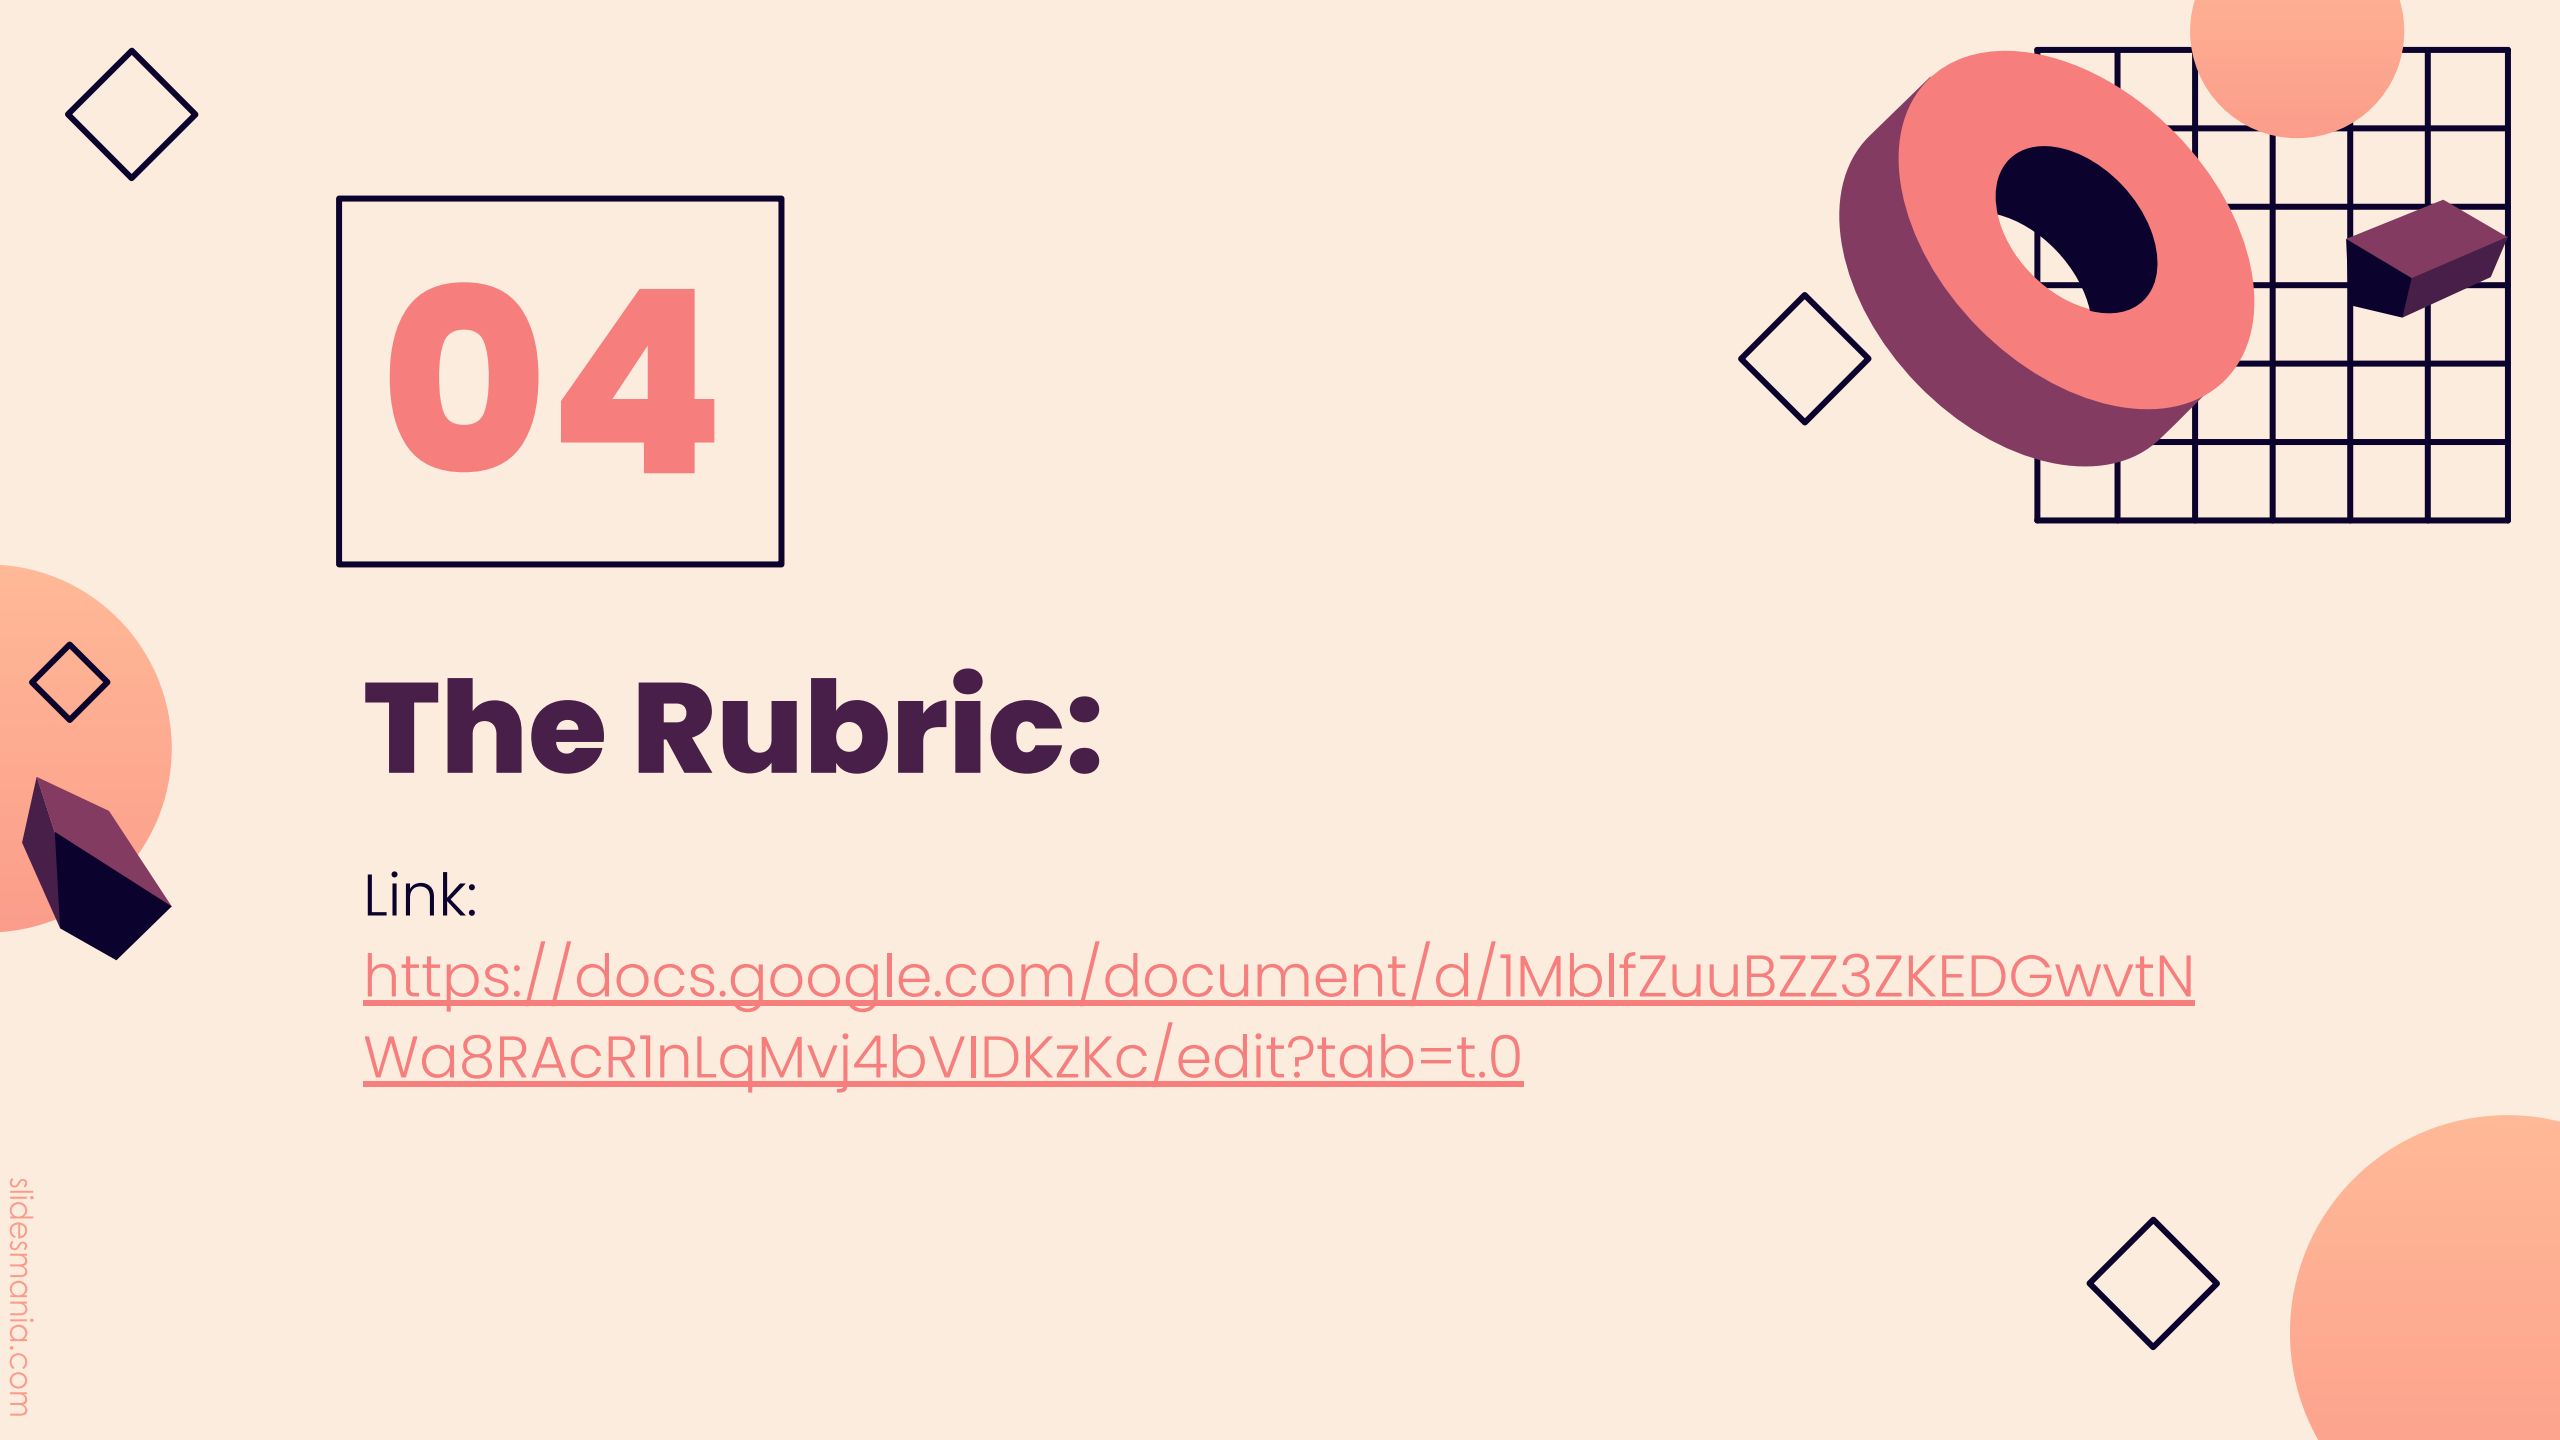

If you used code, you should link it in your submission (zip files or github is okay, please email if you prefer a different format)

04

Assurances form

This is to confirm that you complied with the regulations of the competition – will be sent out as a google form

04

The Rubric:

Link:

Where to find your data

01

Kaggle

- Great datasets
- Some might have code to go along with it

02

Government Open Data

- Public datasets from gov agencies
- [Data.gov](https://data.gov), Census Bureau, CDC, etc

03

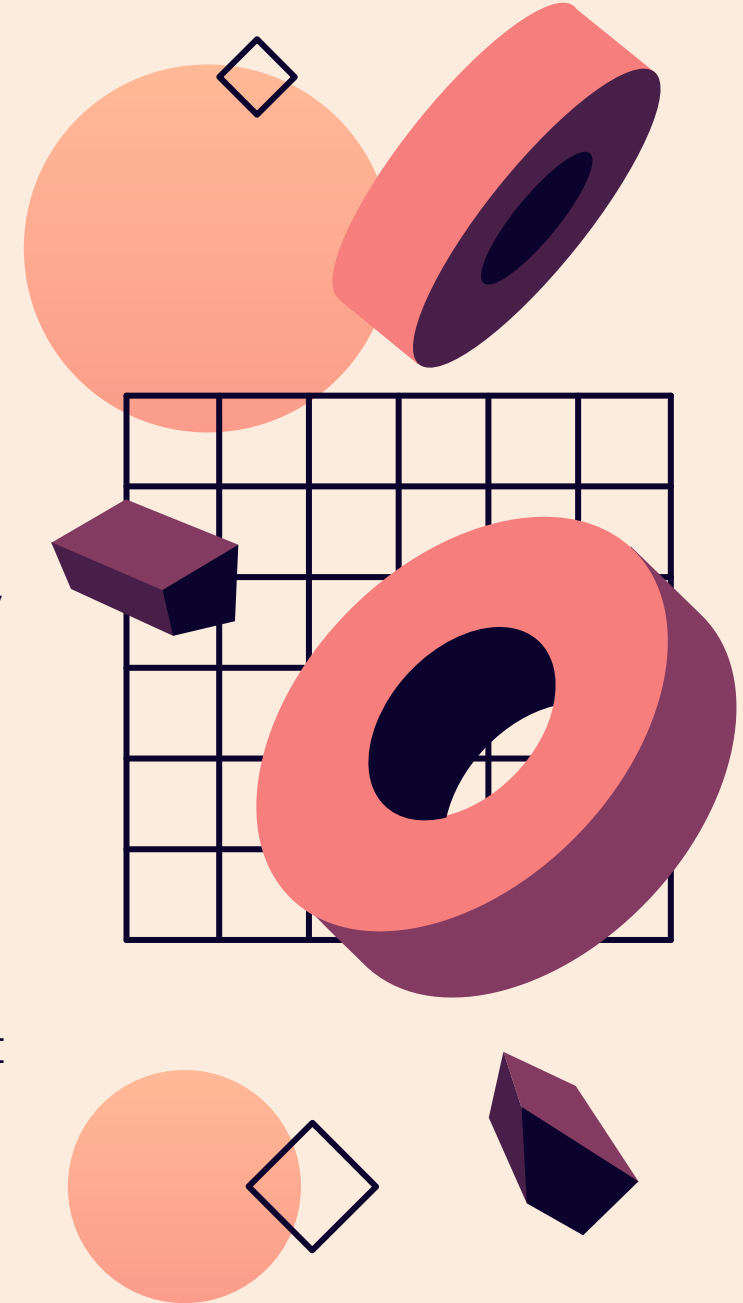

Research papers & reports

- Academic papers may have links to their datasets
- Google Scholar
- JSTOR
- University Research Sites (Cambridge, Oxford, etc)

04

Collect your own data

- Survey/Google form
- Observations/experiments
- Public APIs (Spotify, weather, etc)

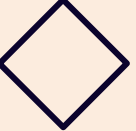

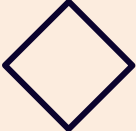

05

Awards Ceremony @ SCU

And what you need to know about the selection and presentation criteria

The top 10

01

3/28

The top 10 will be announced to everyone via email, determined based on the rubric; to be prepared for the in-person presentation as much as possible (in the case you get selected), start prepping the presentation early, NOT IF YOU GET SELECTED

02

3/29: Presentations

The day of, the top 10 will come to SCU to set up at 2, and presentations will begin at around 2:30. All participants and parents are encouraged to come watch and support the presenters.

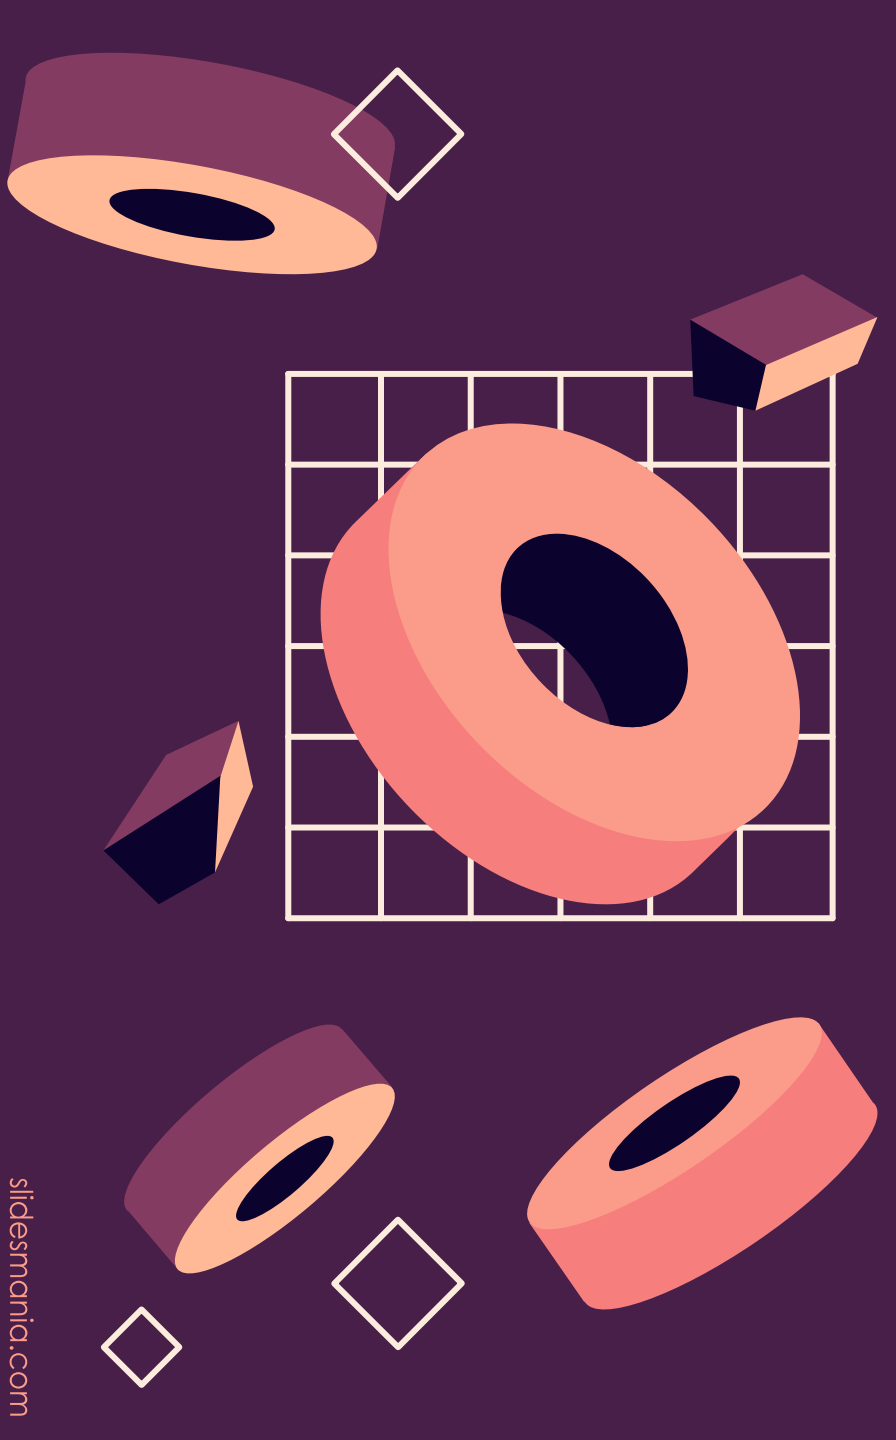

03

3/29: Awards

From 4 to 4:30, there will be a break for everyone to enjoy refreshments while the judges make their decisions. Then, from 4:30 to 5, we will conduct the awards ceremony. Everyone who participated are encouraged to watch the ceremony and network with the SCU professors and professionals!

06

Q&A time!

Thank you!

◇ **We look forward to seeing your progress these next two weeks!**
